Summary

BFA student in Computation Arts at Concordia University, focused on creative programming, interactive media, and game design. With a background in digital media, I have experience in photography, video production, and visual storytelling using Adobe Creative Suite. My creative practice also includes web development, games, and interactive audiovisual projects that combine programming with artistic expression. I completed an AI and Innovation internship at BMW Technology Office China, contributing to AI-assisted workflows, technology research, and multimedia communication. I am interested in combining art, technology, and user-centered design, and enjoy working in collaborative, interdisciplinary environments.
